Webinar

Nissan Push Start System Testing

This class will cover the newest methods used for Nissan starting systems. A common and difficult problem to diagnose with push start/keyless starting systems is a, no crank/nothing powers up concern. Where do I go next, is it the push button, intelligent key, steering lock module, PCM, BCM, IPDM, control relays, wireless ignition node causing the problem? Complete description and operation of all of these components and more will be covered. The use of scanners and wire by wire testing will be shown.
