**Classroom**

**Wednesday March 29th**

**Classroom**

**J2534 PCM Programming**

Opportunities in PCM Reflashing and Reprogramming will cover the practical ways to reprogram domestic and import vehicles using both J2534 Internet reprogramming and OE scan tools. More and more PCMs in today's vehicles are shipped "empty," meaning they require software to allow the vehicle to run or to "marry" the new PCM to the immobilizer system. Without the ability to reprogram, the vehicle must be sent back to the dealer, causing the shop to lose opportunity. Attendees will leave this course with a game plan for how to make software updates and reprogramming part of the services they provide in their shop.
